Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 9-11 are presented for examination. Claims 1-8 have been withdrawn without traverse/prejudice due to the restriction/election requirement and as stated in the amendment filed on 3/9/2004, see page 7, lines 1-3 of Remarks/Arguments section. **However, applicant is suggested to cancel these claims in response to this office action.**

Claim Objections

2. Claim 9 is objected to because of the following informalities: claim 9, line 15, the term "e)" should be "d)" because after step "c)" the next step should be step "d)". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Boden et al. (US Patent 4,770,841).

As to claims 9-11, Boden teaches the invention including a method and datagram for use in communicating between a user terminal and a control system controlling at least one optical device, the method comprising: creating a datagram at a source, said datagram having a source address field, a source field denoting an address of a source optical device (see, figures 3-5 and col. 1, lines 19-34 and col. 4, lines 40-65); a destination field denoting an address of a destination optical device and a system overhead field containing data (see, figures 3-5 and col. 4, lines 40-65 and col. 8, lines 34-46); a command field containing an indication of at least one step to be executed regarding said data (see, figures 1-5 and col. 1, lines 19-51 and col. 3, lines 53-63); and transmitting said datagram to a destination extracting said data at said source and initiating said at least one step wherein said datagram is used internally by said control system to communicate between different modules in said control system (see, abstract and figures 1-5 and col. 3, lines 53-63 and col. 4, lines 40-65 and col. 8, lines 34-46).

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
